WHAT IS WATER TREATMENT  
Why Do I Need a Water Treatment System?

Our Aqualife Luma water treatment systems eliminate harmful substances such as chlorine, heavy metals, sediment, bacteria, iron, manganese, and unpleasant odors, ensuring your water is clean and safe for drinking, cooking, and bathing. With CleanFlow, you protect your health, improve water quality, and extend the lifespan of your plumbing and household appliances.

Did You Know ?

Di Indonesia, lebih dari 50% air bersih yang digunakan oleh masyarakat sebenarnya terkontaminasi bakteri dan zat berbahaya. Fakta ini menunjukkan bahwa air yang terinfeksi jernih belum tentu aman untuk diminum. Tanpa peringatan yang tepat, air dapat mengandung bakteri, virus, dan bahan kimia berbahaya yang dapat menyebabkan berbagai penyakit.

Prevent Scale, Rust, and Odor—Protect Your Health and Appliances

Untreated water often contains minerals, iron, and other impurities that lead to scale buildup, rust, and stains on household appliances. With Aqualife ClearFlow, your water is purified leaving your faucets, showers, and fixtures clean, rust-free, and longer-lasting. Protect your family's health and your appliances with every drop.
